

Streaming Server Quick Start

Shortest safe path to the first verified broadcast.

Administrator first setup

- Sign in at /login with OWNER or ADMIN.
- Create the client organization.
- Create or assign client staff.
- Create a radio or video channel.
- Generate the ingest credential and deliver it privately.
- Use RTMPS TCP 1936 for public video publishing.
- Run a short test before the real event.

First live video

- Open the assigned workspace and correct channel.
- Configure the encoder for custom RTMPS.
- Enter the server and channel credential.
- Start a 20-30 second test.
- Open the public live page and confirm playback.
- Stop the encoder and confirm OFFLINE.

First AutoDJ radio

- Upload at least two audio tracks.
- Wait for processing.
- Create a playlist and add the tracks.
- Assign/schedule it to the radio channel.
- Open the public radio URL and verify playback.

First VOD or podcast

- Upload and process media.
- Open VOD or Podcasts.

- Create the item and select media.
- Choose FREE, PREMIUM, or PRIVATE.
- Publish and test the public page.
